
**CONCRETE ACTION
TO BE TAKEN AT
NATIONAL LEVEL**

TANZANIA

INFORMING THE NATIONAL POLICY DEVELOPMENT PROCESSES ON THE NAIROBI WORKSHOP FINDINGS

- The five key areas recommended for consideration at national level
 1. Key issues and request them to prioritize
 2. Policy statements and actions to be developed for inclusion in the priority national policies for organic agriculture

1. 0 On Domestic Market Development

- Creation of awareness
- Market infrastructure
- Management of quality and integrity of organic products
- Targeting locally consumed products
- Strengthening producer organizations/associations and cooperatives

Export Markets

- Support development of the capacities of the certification bodies
- Encourage collaboration at national and regional levels for market access
- Support ICT for marketing purposes
- Support market research
- Support training on OA to extension, traders and producers and policy makers

Increase Production and Productivity in OA

- Promote the use of bio-inputs
- Facilitate registration and trade of bio-inputs
- Identify areas for intensive promotion of OA production

Creating Policy Framework Friendly to OA

- Develop legislation in support to OA
- Advocate for OA to be considered in the macro policy strategies and programs
- Support the private sector to develop its capacity to serve the organic agriculture sub-sector (e.g. in manufacturing, procurement and distribution of inputs)
- Create OA dedicated facilities in the research, training and extension

Bridging the Gap Btm Research and Policy Development

- Support research in policy research and create dialogues with other research institutes including those outside the sector and even beyond the national levels
